It's not just what we do, but why we do it.

Westin Boston Waterfront Plaza: Boston, MA

The single most important thing we've learned over our history is that building matters. Combining technical expertise and motivation to bring new life to spaces, BACR delivers projects that make meaningful impacts for clients and the built environment.

## OUR ASSOCIATION...

ICRI, the only association in the concrete industry devoted solely to repair and restoration, publishes a bimonthly magazine and technical guidelines for concrete repair, and cosponsors the World of Concrete. Local chapters provide regional networking opportunities. Worldwide membership include contractors, manufacturers, engineers, distributors, owners, and other professionals with a common goal: prolonging the useful life of concrete through quality repair, restoration, and protection.

## OUR MISSION...

The mission of the International Concrete Repair Institute is to be a leading resource for education and information to improve the quality of repair, restoration, and protection of concrete and other structures in accordance with consensus criteria.

## LETTER FROM OUR PRESIDENT

A new decade is upon us, and it looks like we are going to have another busy construction season. As your 2020 ICRI-Chicago Chapter President, I am honored to serve you along with the rest of our Board of Directors. Previous Chapter Presidents have set a high bar for the work which they accomplished. This can be seen by our increased membership, which has grown to almost 150.

Committees are currently in the process of planning events for the remainder of the year. I urge you to join one of them to provide your input, and lend a hand. We are always

looking for help. If you weren't already aware, all active members of our chapter are eligible to serve on a committee and attend board meetings. Typically, board meetings immediately precede our dinner meetings. Please feel free to join us, and consider running for a Board of Director position next year.

Similar to previous years, we are planning to have four dinner meetings, our fun-filled golf outing at White Pines, a summer social event, our all-day technical seminar in the fall, and a complimentary holiday party at the end of the year. We also intend to continue having joint activities with other organizations. Please check out our calendar of events and our website [www.icrichicago.org](http://www.icrichicago.org) for more information.

In an effort to continue improving our organization, I am asking for your input. As such, we created a new position on our Board this year. Tom Lawler, our Immediate Past President, will take on the duties of our Chapter Secretariat. Tom will gather ideas from members like you and pursue their implementation. If you have any suggestions which may benefit our chapter, please send them to Tom at [info@icrichicago.org](mailto:info@icrichicago.org).

As 2020 moves forward, let us remember to take time to appreciate all those who have done so much to make our industry and organization successful. We can do that by setting a good example for those who will carry on our work after us.

Have a happy and safe 2020!

Sincerely,

*Mike Wiscons*

NOVEMBER DINNER MEETING HIGHLIGHTS

**Which to Choose? Terra Cotta or GFRC?**

Panel members including Lurita McIntosh Blank of Raths, Raths & Johnson, Bill Mahler of WGI, Noel Weidner of Gladden McBean, and Mark Kuberski of Central Building and Preservation presented the pros and cons of using either terra cotta or GFRC as a replacement for original terra cotta on November 19, 2019 at the Westwood Tavern in Schaumburg, Illinois. A panel discussion led by Bill Mahler highlighted the advantages of each product and how the different products have been used on numerous projects over the years.

The panelist's knowledge of the production, installation and longevity of each product as well as the historical preservationist perspective provided friendly banter between the panelists. The attendees now know who to contact when they are tasked with restoring a terra cotta clad building with either product.

Thanks again to each of the panelists and the ICRI Chicago Chapter Programs Committee for providing several educational opportunities for our members. Be sure to attend each dinner meeting this year to expand your knowledge of concrete restoration and build new and strengthen existing relationships with ICRI members.

**NOVEMBER 2019 ICRI/SEA01 CHICAGO CHAPTER SEMINAR HIGHLIGHTS**

Topic: Assessment and Repair of Concrete Structures

The ICRI Chicago Chapter in conjunction with SEA01 sponsored a seminar on the Assessment and Repair of Concrete Structures. The seminar was hosted by Wiss, Janney, Elstner Associates, Inc. (WJE) at their Northbrook office. Several speakers from industry leading companies presented various concrete assessment and repair topics. A hands-on portion of the seminar was conducted in WJE's laboratory including demonstrations of various concrete repair products and field and laboratory evaluation techniques and equipment. The seminar was well attended, approximately 65 people attended the morning session and over 75 people attended the afternoon laboratory session. All attended the networking event after the seminar, which was a perfect top off to the eventful day.

The classroom presentations were broken into six different categories. Colin Rueb from Raths, Raths & Johnson, Inc. and Anthony Bentivegna of Jensen Hughes started the day off by discussing the signs of concrete deterioration and its underlying mechanisms. The physics of concrete deterioration and examples of different types of deterioration were covered. Next, Nathaniel Rende of Wiss, Janney, Elstner Associates, Inc. and Ryan Carris of Walker Consultants discussed the evaluation techniques of a concrete structure. Various non-destructive and destructive techniques were discussed. Kevin Conroy of Simpson Gumpertz & Heger, Inc. discussed various aspects of concrete repair design and the selection of proper materials. After lunch, Kyle Stanish of Klien & Hoffman, Inc. discussed various concrete protection systems and the service life of concrete repairs. The protection systems varied from galvanized pucks to full cathodic protection systems. Lastly, Paul Gaudette of Wiss, Janney, Elstner Associates, Inc. and Don Redar of Bulley & Andrews Concrete Restoration discussed the restoration of the North Shore Congregation Israel concrete structure. The concrete deterioration evaluation process, multiple concrete batching, repair design issues, and construction techniques were discussed. All who attended the classroom sessions walked away knowing more about concrete: how to assess concrete distress, and how to repair concrete.

In the laboratory program portion, six different stations were set up to present various evaluation and repair techniques. The Field Evaluation Techniques station included presentations on how to detect concrete abnormalities such as cracks and voids as well as reinforcement location. Demonstrations were made using ultrasonic-pulse response and ground penetration radar units as well as rebar detectors. The Laboratory Evaluation Techniques station had various samples of deteriorated concrete which could be examined close-up as well as live demonstrations of microscopic evaluations of concrete. The Concrete Crack Repair station demonstrated repairing existing cracks with epoxy and urethane injection. Emphasis was placed on the installation and spacing of the injection ports relative to the thickness of the members being injected. The Concrete Topical and Buried Membrane station demonstrated in-situ bond testing of coatings as well as the installation of topical and buried membranes. The Concrete Vertical Coatings station exhibited numerous wall coatings. The presenters discussed the advantages of each system type and performed coating adhesion tests. The Concrete Repair Materials station compared various concrete material types and described how the material properties and installation consistency make them appropriate for differing applications.

The day ended with a networking mixer where attendees could ask specific questions of the manufacturers. Food and donated microbrewery beverages were enjoyed by all. The mixer was a good wind down for the information-packed day.

ICRI would like to thank SEA01 for co-sponsoring the seminar and WJE for allowing the seminar group to use their learning center as well as their laboratory for the presentations and laboratory programs. A special thanks goes out to each of the presenters and laboratory program participants who assisted with this seminar: Colin Rueb, Anthony Bentivegna, Nathaniel Rende, Ryan Carris, Kevin Conroy, Kyle Stanish, Paul Gaudette, Don Reader, Sika, Lilly Corp., BASF, Hydrotech, Tremco, Neogard, WJE, Prosec, Sherwin Williams, JE Tomes, and Euclid.

ICRI thanks the following companies for sponsoring the event: Wiss, Janney, Elstner Associates; JE Tomes; Evonik; Neogard; BASF; Sherwin Williams; Sika; Euclid Chemical; Structural; Simpson Gumpertz & Heger; Hach Construction; Zera Construction; Raths, Raths & Johnson; JLJ Contracting; Sitar Construction; Klein & Hoffman; Monson Nicholas; Western Specialty Contractors; Tremco; Bulley & Andrews Concrete Restoration; and Hydrotech.

A final thanks goes out to ICRI's Stephen Schmitt and SEA01's Kevin Conroy and all others for their time and effort put into the preparation of this successful seminar.

# PEOPLE ON THE MOVE

The Glenrock Company would like to recognize **Jim Nicholl's** 20-year anniversary with the company. Throughout the years, Jim's presence and leadership have been exceptional as he has lead Glenrock to become the recognized leader in distribution of restoration, waterproofing and sealant products and systems throughout the Midwest.

Most recently, Jim has announced that he will be retiring at the end of the year, 2019. On behalf of all of us at Glenrock, we wish Jim and his wife Joan well in the years to come!

Congratulations Jim on an extraordinary career!

**Joseph Amrein** has been named President of the Glenrock Company, effective January 1, 2020.

**Patrick Coakley** has been named Sales Manager of the Glenrock Company, effective January 1, 2020. Pat began his career with the Glenrock Company over 25 years ago, having served in a variety of capacities, most recently in the role of Sales Representative. Pat will clearly bring an abundance of industry knowledge and experience into his new position.

Congratulations Pat!

**Brian Cusack** has been promoted to Sales Representative for the Glenrock Company. In his new role, Brian will be capitalizing on his many years of inside/technical sales experience with Glenrock.

Congratulations Brian!

## ANNOUNCEMENT

# THE GLENROCK COMPANY'S ANNUAL "STATE OF THE ART SHOW"

**Thursday, February 27, 2020**

The Drury Lane Theatre (Rte. 83 and Roosevelt Rd., Oakbrook Terrace)

**4:00 p.m. to 8:00 p.m.**

COCKTAILS • HORS D'OEUVRES • RAFFLE PRIZES

Come see the latest in New Construction, Restoration and Waterproofing technology from over 30 of our industry's leading manufacturers'.

Please call for details regarding the "Rock Solid" Continuing Education seminars featuring Professional Development hours.

*Stop by the ICRI booth and say hello!*

Please RSVP at [mhogan@glenrockcompany.com](mailto:mhogan@glenrockcompany.com)  
or (630) 530-9600

*Specialists in the industry since 1967!*

## FEBRUARY DINNER MEETING ANNOUNCEMENT: ICRI 2019 PROJECT AWARDS

Join your ICRI Chicago Chapter as we recognize and celebrate the 2019 Project Award Finalists

**Tuesday, February 18th at 5pm**  
**Erie Café – Chicago**

The two project finalists are:

**Project of the Year**

Weiss Memorial Hospital Parking Structure Maintenance Repairs

**Walker Consultants**

**Golf Construction**

**Award of Merit**

Groupon Building 600 W. Chicago, 900 N Kingsbury / 950 N. Kingsbury

**Klein & Hoffman**

**Bulley & Andrews Masonry Restoration**

**ICRI 2020 SPRING CONVENTION “REPAIRS TO NEW CONSTRUCTION: PREPARE FOR THE UNEXPECTED”**

Plan to join the International Concrete Repair Institute in Vancouver, British Columbia Canada – Expand your understanding of concrete repairs to new construction through networking, technical sessions, and participation in ICRI National Committee Meetings. Earn PDH credits by attending technical sessions.

## HOLIDAY SOCIAL HIGHLIGHTS

**Once Again, Holiday Social a Success**

On December 12th, the Chicago Chapter of ICRI held its annual Holiday Social at Pyramid Pizzeria, allowing friends and industry partners to celebrate our 2019 construction season success. The social event allowed the attendees to catch up with colleagues, discuss holiday plans and enjoy some food and drinks.

Thank you to the ICRI Chicago Chapter Social Activities Committee and the staff at Pyramid Pizzeria for another successful event!

## ICRI CHICAGO CHAPTER IS ALSO ON SOCIAL BUSINESS MEDIA!

For chapter and industry related discussions, connect with us on social media.

Suggestions for items to be included on social media?

Are you savvy and want to help our communications committee?
